

# How to Adjust Screen Resolution

As a result of the amount of information presented on screen by Rapid Review, a minimum screen resolution of **1024 x 768 pixels** is recommended.

In Windows, to adjust the screen or display resolution:

- Click on the **Start** button, and select **Settings** and then **Control Panel**.
- From the Control Panel, select **Display** to open the Display Properties screen.
- Click on the **Settings** Tab.
- Move the slider to **1024 by 768 pixels**. (Windows default setting is either 800 by 600 pixels or 640 by 480 pixels)
- Set the Color quality as high as your display adapter will support (at least 256 colors recommended).
- Click **Apply**, and then click **OK**.
- Depending on your system, you may need to restart your computer for the settings to take effect.

On the Mac, to adjust the screen or monitor resolution:

- Open the **Apple** menu, and select **Control Panels** and then **Monitors**.
- Under **Resolution**, select **1024 x 768**. Changes will immediately take effect.
- Color Depth should be set as high as your display adapter will support (at least 256 colors)
